DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 – 40, 47 and 48, drawn to a system and process for constraining and directing the movement of a walker in a space with respect to some distinguished location in the space, classified in class 700, subclass 56.
- II. Claims 41 – 46, drawn to a process for determining the location of an object in a space, classified in class 700, subclass 64.
- III. Claims 49 – 52, drawn to a self-organizing pheromone infrastructure, classified in class 700, subclass 47.
- IV. Claims 53 – 55, drawn to an undirected coordination system, classified in class 700, subclass 19.

The inventions are distinct, each from the other because of the following reasons:

Inventions I – IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, the different inventions each have different modes of operation.

Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the apparatus as claimed can be used to practice another and materially different process. For example, the

system or apparatus of group I can be used to direct or constrain a walker apparatus in a space. Whereas in the process of group II, the walker apparatus is utilized to form a distance profile, then the location of a pump associated with and object is determined using the distance profile.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to John G. Posa on 3/15/2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian J. Sines whose telephone number is (571) 272-1263. The examiner can normally be reached on Monday - Friday (11:30 AM - 8 PM EST).
